#HealthyBuildings

What do I need to know?

Indoor Air Quality

System Considerations	Recommendation
Air Filtration	Minimum MERV13 and consider MERV15
Air Exchange / Fresh Air Rates	Fresh air rates up to 30% higher than code minimum and/or HVAC design with 100% outdoor air; Air change rates to be evaluated/optimized with CFD analysis
Humidity Control	Year-round humidity between 40-60%, which would require active humidification during heating mode
Pressurization	Pressurize to induce airflow from one space to another; design for maximum fresh air in occupied zones
Ultraviolet (UV) Light	Reference ASHRAE guidance for UV integration, taking care with shielding requirement to prevent direct exposure to human tissue/eyes
Air Quality Monitoring	Take advantage of growing monitoring options to support continued tracking of air quality

Reference: [Buro Happold, Engineering Healthy Workplaces News Feed](#)

Cleaning

- High and low touch areas
 - What's the plan?
 - Transparency.
 - Supplemental cleaning?
 - Training
 - Purchasing policy
- Cleaning products
 - Again, transparency.
 - Balance safety with human health

Wellbeing

At least **one in five workers** experience common mental health problems, including anxiety and depression.

71% of adults reported at least one symptom of stress, such as a headache or feeling overwhelmed or anxious.

Reference: [CDC, Mental Health in the Workplace](#)

Maintaining Sustainability

- Increase cleaning vs. disposability
- Increase bicycle infrastructure and promote shared bike programs
- Promote reusable masks

Contact

Initial Procedures When Returning

- ▶ to Work

RTW (Return to Work) Committee

- ▶ **Create a committee to police new policy compliance**
- ▶ Be sure to include:
 - ▶ A partner who is respected by the majority of the firm
 - ▶ A member of administration - preferably the Director of Administration
 - ▶ A trusted associate
 - ▶ A trusted paralegal
- ▶ Be prepared to institute fines for noncompliance which may include but are not limited to reductions in year-end discretionary bonuses.
- ▶ It may become necessary for the committee to internally publicize offenders.

Basic Initial Policies

- ▶ Set up an iPad with a questionnaire that ALL people entering the office must answer. An online version of the questionnaire should be made available to employees.
- ▶ Prepare a seminar in which all employees must participate prior to returning to the office.
- ▶ Prepare an RTW policy that all employees must review and sign.
- ▶ There must be no penalty for an employee who states that he/she needs to work from home or needs to go home early.
- ▶ Human Resources department must have a list of hotlines for mental health organizations.

Stay Tuned.....

- ▶ Expect things to change.
- ▶ No one will win a gold medal for requiring their workforce to return to the office sooner rather than later.
- ▶ Expect approximately 50% of your workforce to work remotely going forward.

Arenson

Given the current health concerns created by COVID-19, we have researched how furniture can be adapted to provide Safe Zones. After reviewing your furniture typicals and layouts Arenson can help you in creating these Safe Zones.

Keeping You Safe

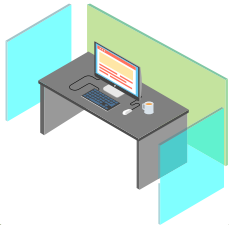

Workplace Assessment

- Dimensionalize the workspace
- Understand people flow
- Evaluate communal & collaborative areas

Government & Company Policy

- Discuss and understand company Policy for re-entry
- Understanding Federal, State and Local guidelines

Creating Safe Zones

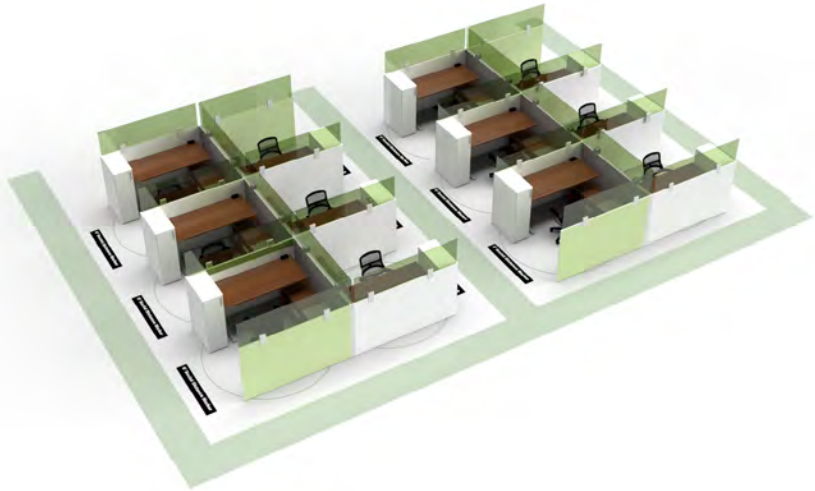

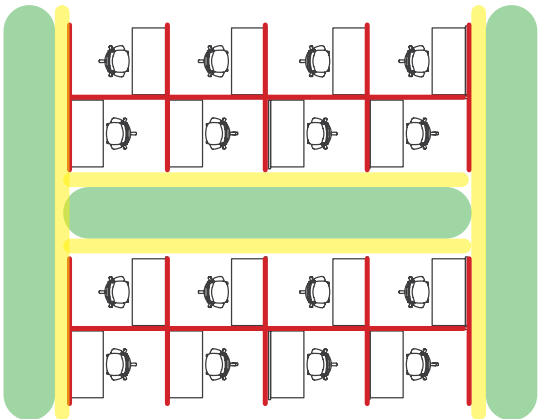

Process / Recommendations

- Understand and develop protocols.
- Develop goals and consider options to achieve them.
- Consider cost alternatives.
- Develop people flow and graphic package.
- Comply with and implement government guidelines protecting both the Company and the Employees.

The Process:

- The Arenson audit determines weaknesses or hotspots for consideration.
- The Arenson process and assessment phase determines how those weaknesses can be mitigated.
- The solutions or recommendations are determined from a vast inventory of alternatives, the selection of which is determined by discussing and understanding the clients drivers. Cost, Aesthetics, Permanence, Schedule, and Governance must all be considered.

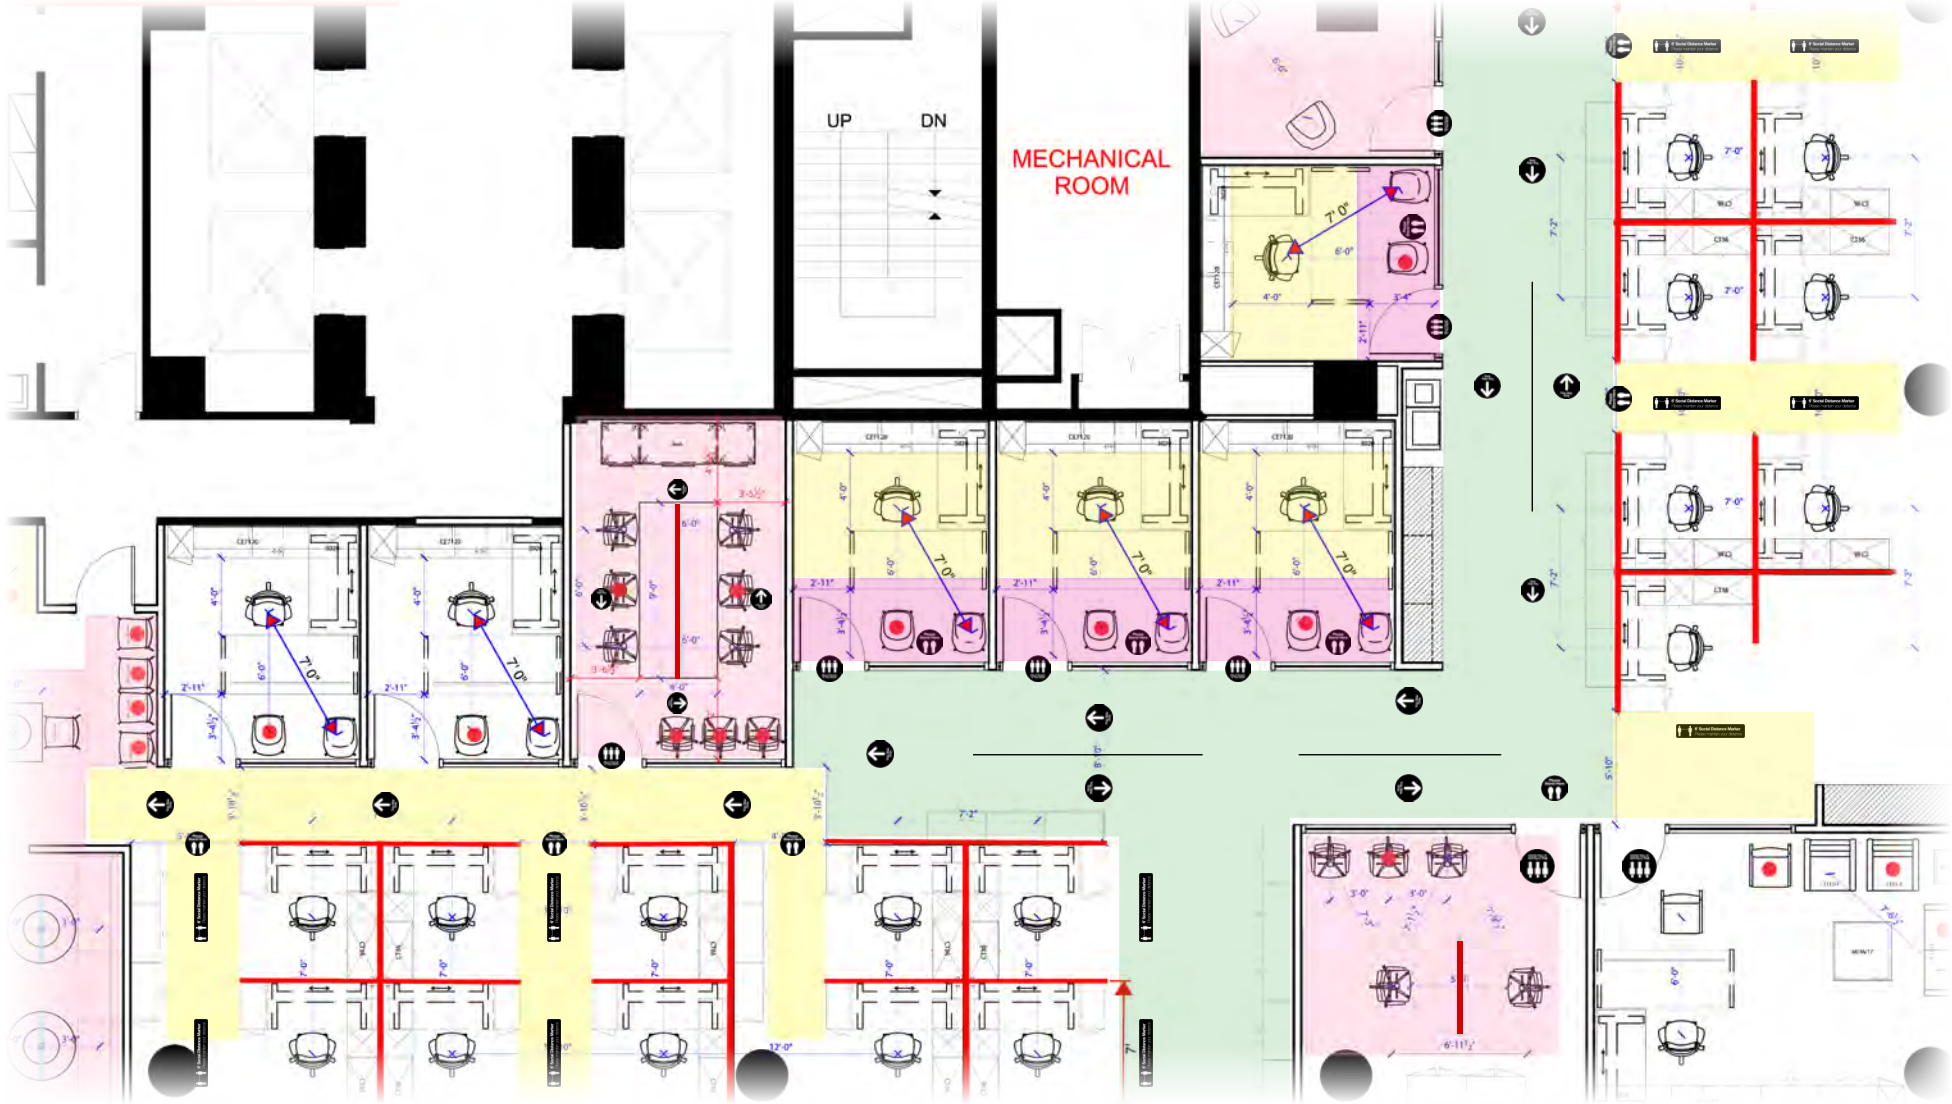

“Restructuring the workplace to meet CDC guidelines with either temporary or permanent solutions is a task that must be done before contemplating going back to the office.”

The New York Times

What to Expect:

- Areas to Consider (Color-coded floorplans)
- Circulation Flow with arrows.
- Instructional graphics to assist employees.

Arenson | Color Key

Green Areas

Areas that would be 6' compliant

Yellow Areas

Cautionary areas that should be reviewed for 6' distancing

Red Areas

Areas not compliant with 6' distancing.

Red Lines

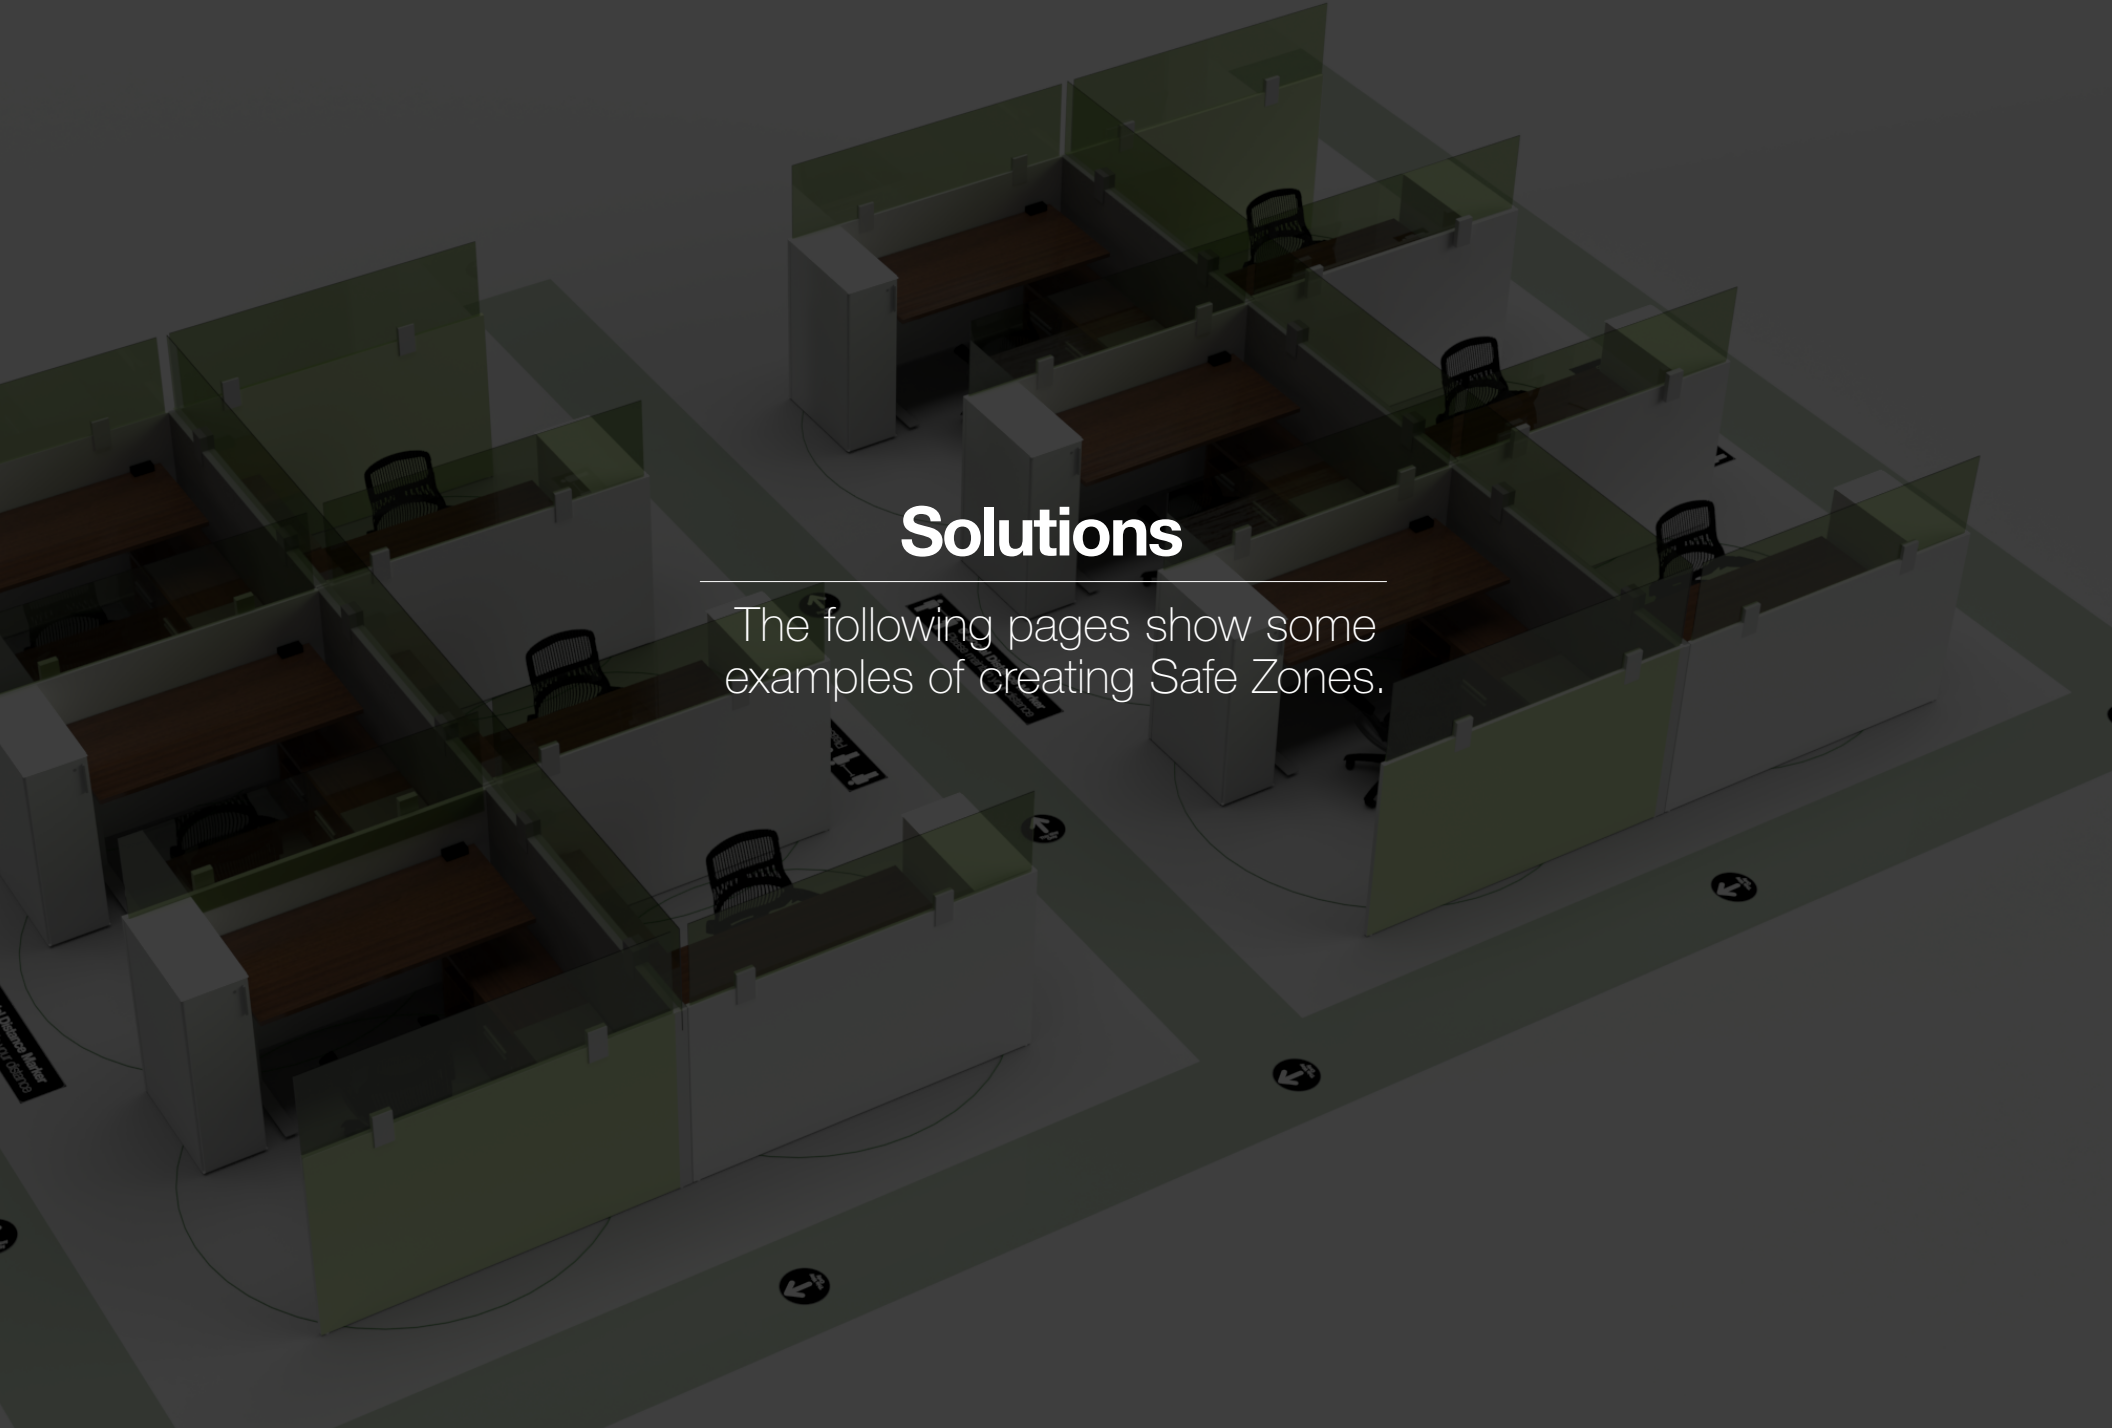

Areas for increase in panel heights or screen additions

Red Dots

Ancillary items that should be removed to create social distance

Solutions

The following pages show some examples of creating Safe Zones.

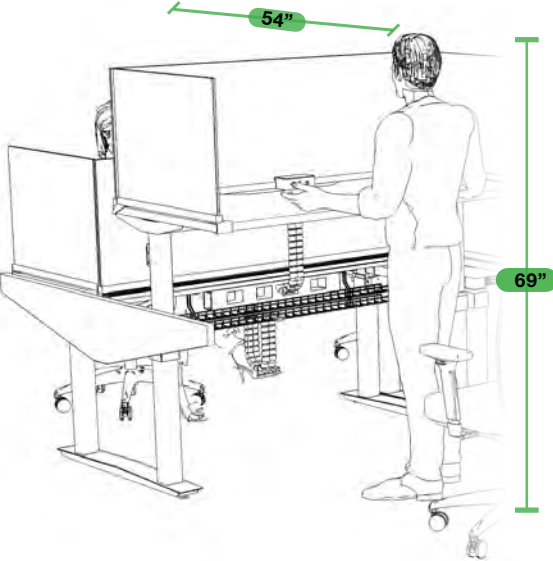

Safe Zones can be created through one of these two methods

Safe Zone Through Barriers

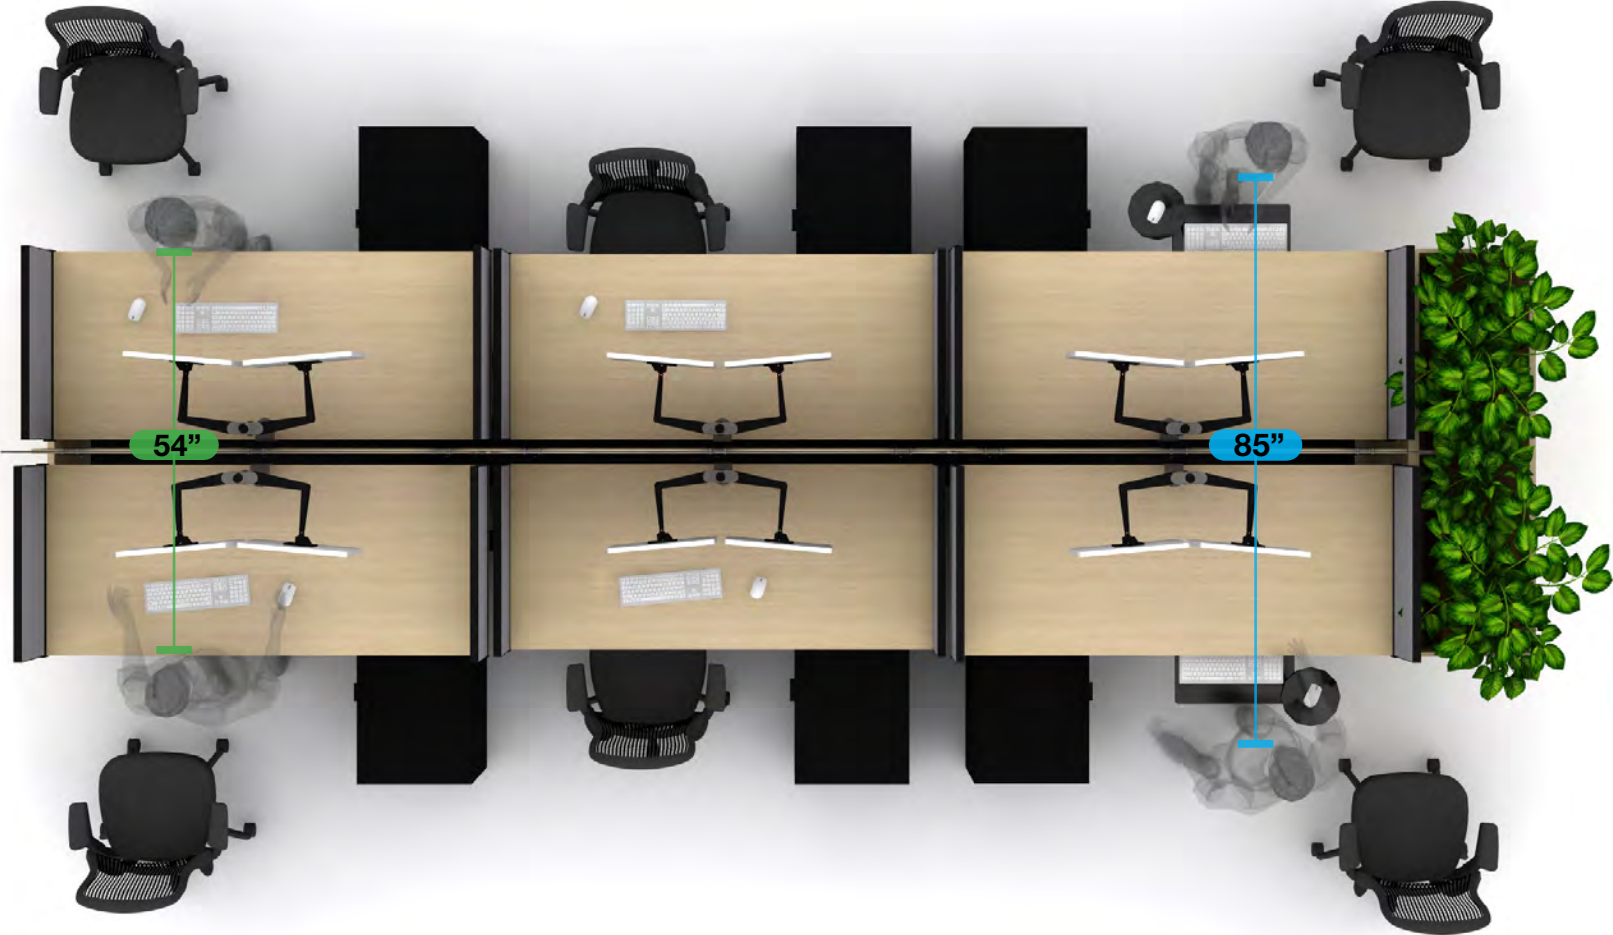

Additions like screens create a physical barrier between associates.

Safe Zone Through Social Distance

Moving people apart, creating a spacial buffer to achieve CDC guidelines.

* Average height of:
US male 5'9" / Female 5'3"
According to the CDC.

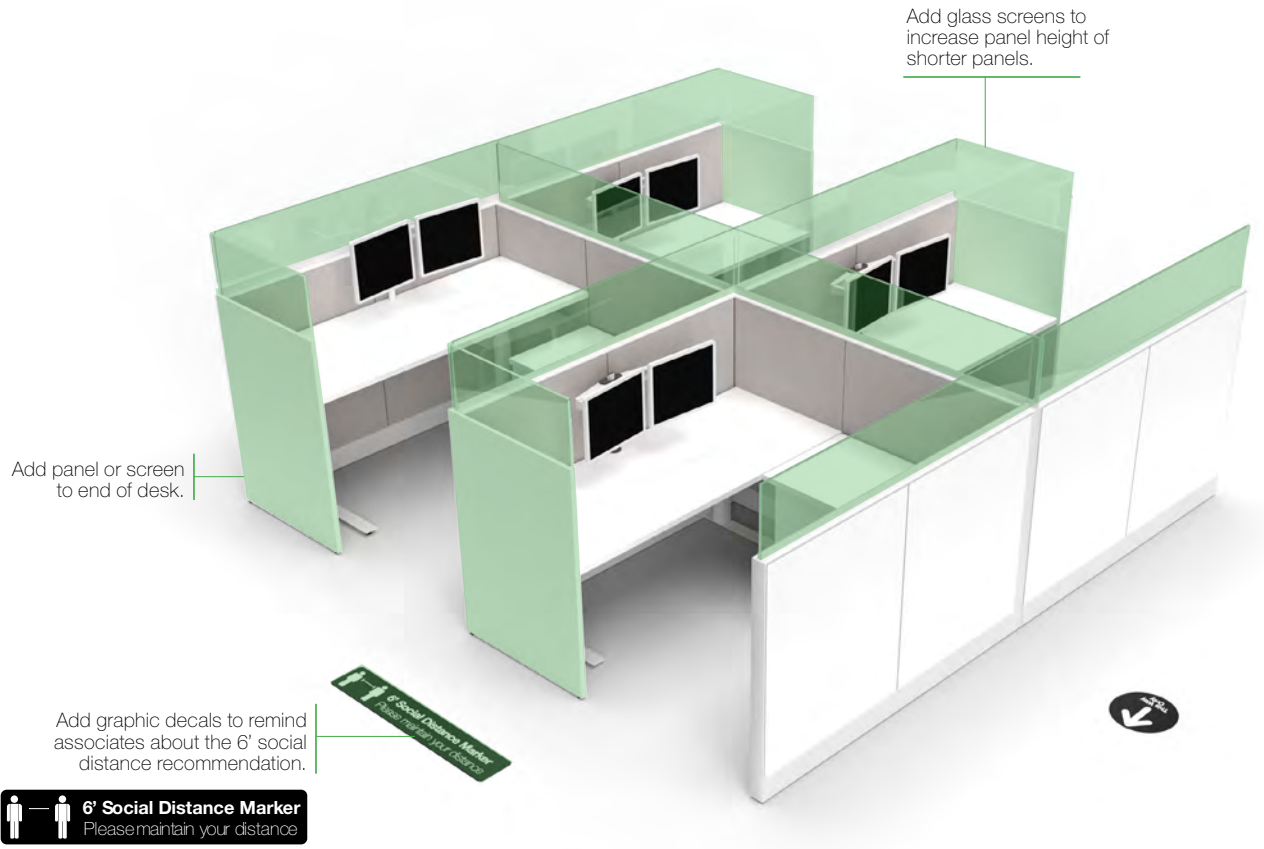

Arenson
**Creating
Safe Zones**
Panel Based
With Return
Example

Original Configuration

Safe Zones Adjustments

Examples of Adjustments made to create Safe Zones

Add panel or screen to end of desk.

Add glass screens to increase panel height of shorter panels.

Add graphic decals to remind associates about the 6' social distance recommendation.

Add graphic decals with clockwise walking flow guides.

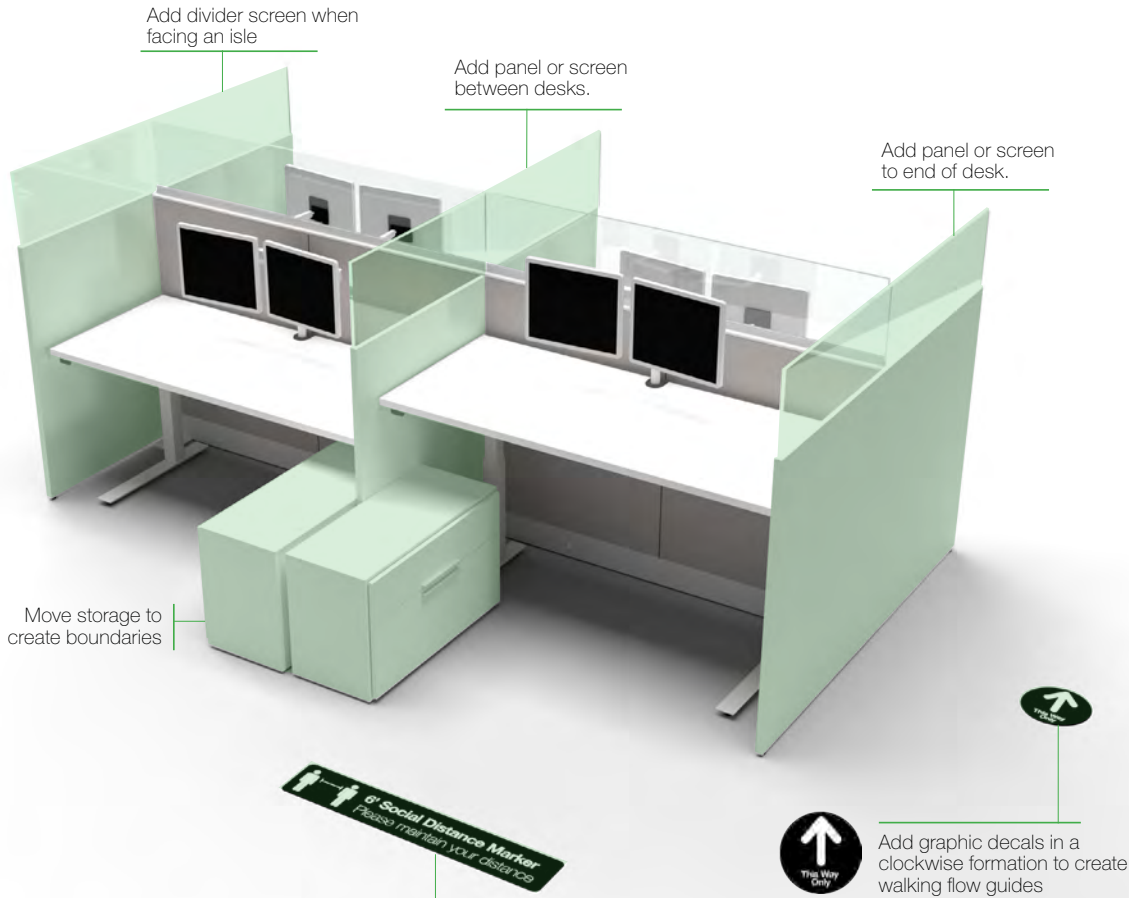

Color Legend
● Safe Zone Through Barriers Example

Original Configuration

Safe Zone Adjustments

● Examples of Adjustments made to create Safe Zones

Add graphic decals to remind associates about the 6' social distance recommendation.

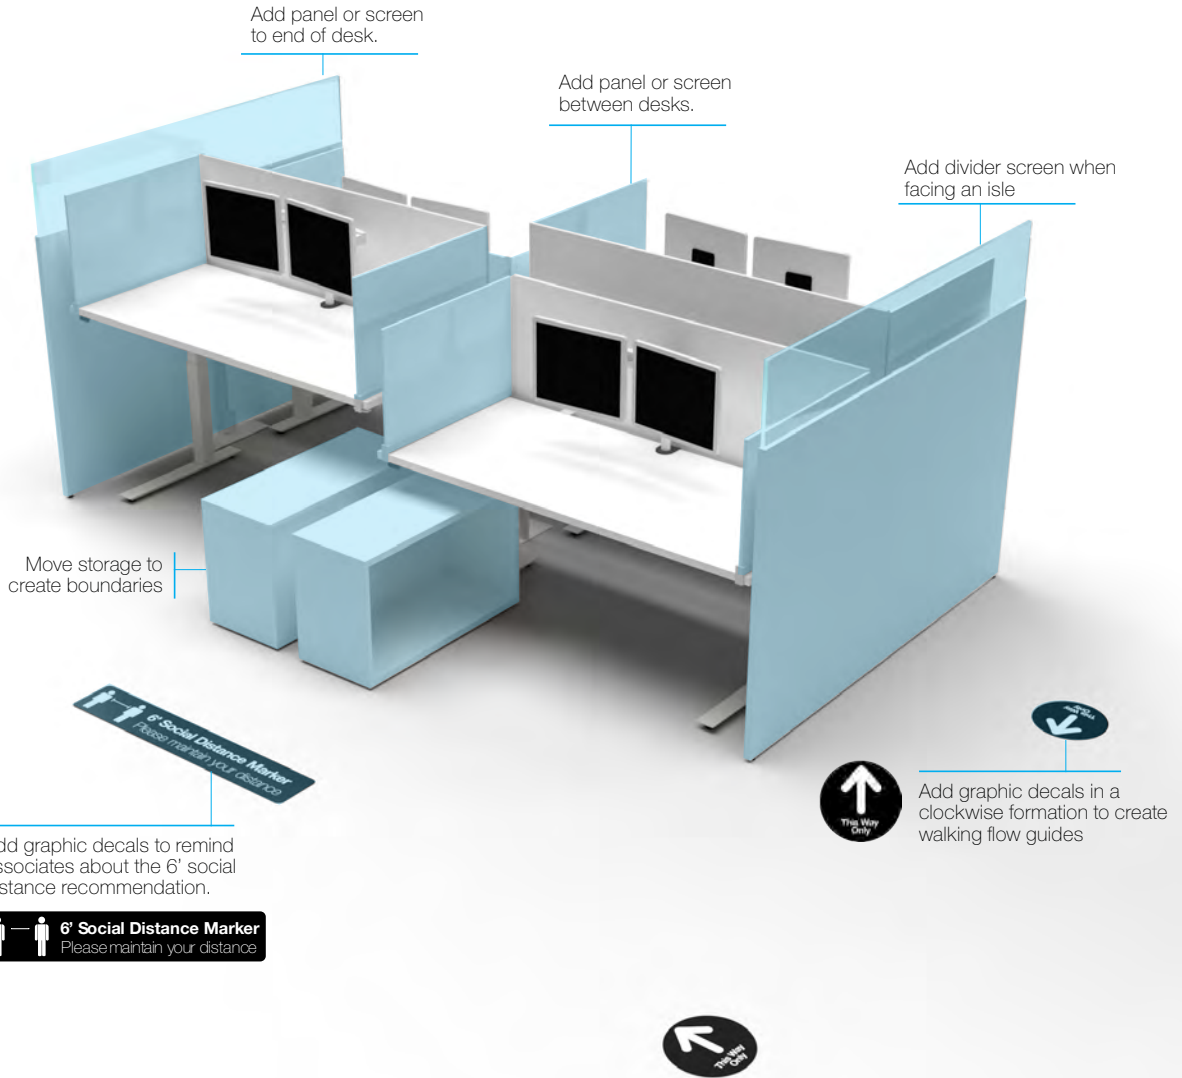

Add graphic decals in a clockwise formation to create walking flow guides

Original Configuration

Safe Zone Adjustments

Add graphic decals to remind associates about the 6' social distance recommendation.

Add graphic decals in a clockwise formation to create walking flow guides

Original Configuration

Safe Zone Adjustments

Examples of Adjustments made to create Safe Zones

Decommission guest seating

Add graphic decals to remind associates about the 6' social distance recommendation.

Add graphic decals with maximum capacity for Private Offices and conference rooms.

Original Configuration

Safe Zone Adjustments

Examples of Adjustments made to create Safe Zones

Rearrange Seating to maintain 6' of distance

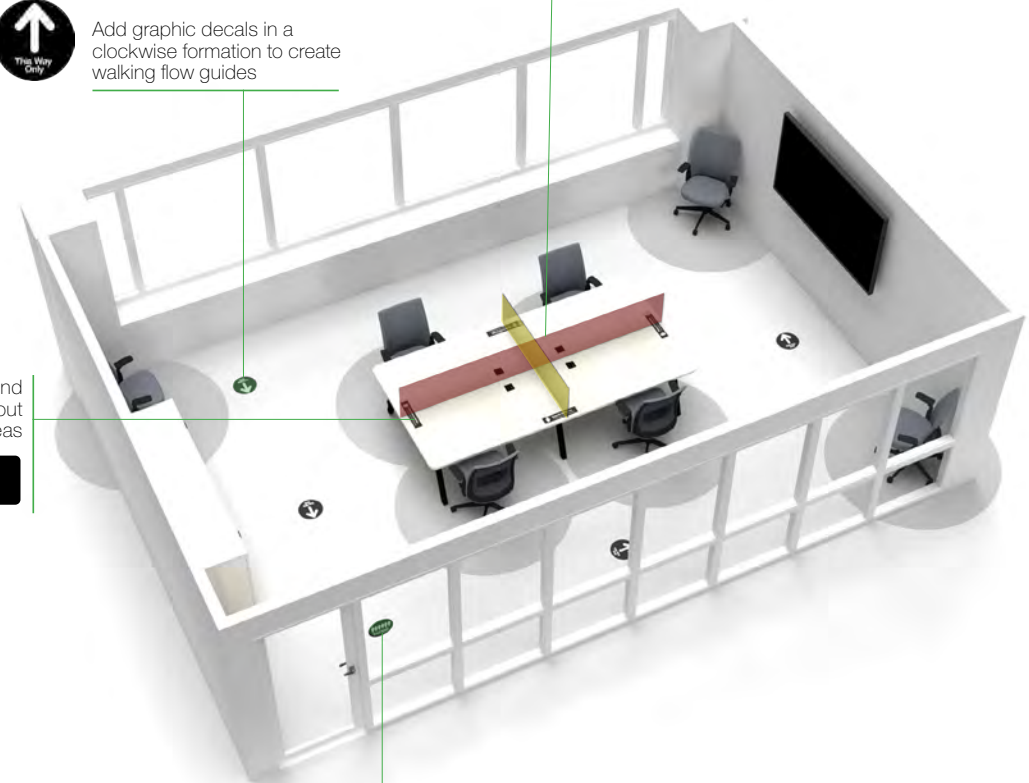

Add graphic decals in a clockwise formation to create walking flow guides

Add screens between people.

Add graphic decals to remind associates about no seating areas

 **Please Do Not Sit Here**
To Maintain Social Distance

Add graphic decals stating rooms maximum capacity

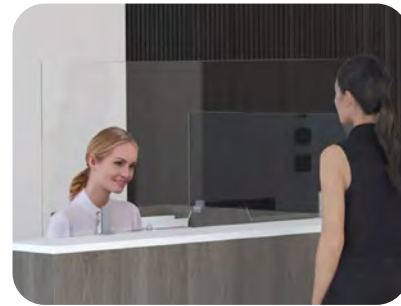

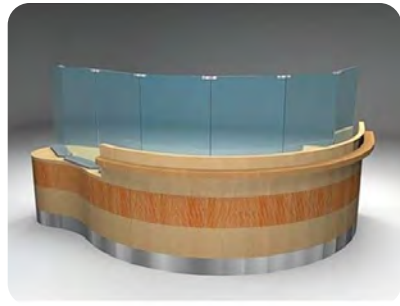

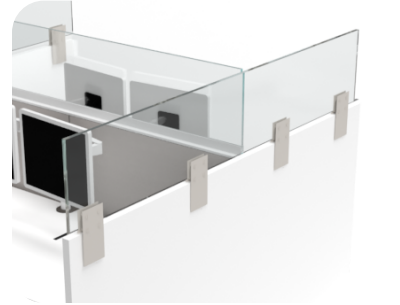

Options

The following pages include samples of products that may be utilized to create Safe Zones.

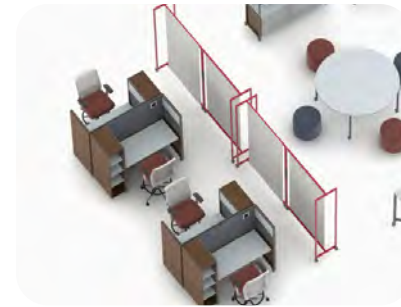

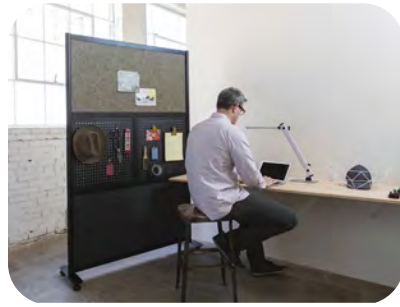

Barriers for Desking

The images below represent only a few examples of the many products available to safely separate staff at their desk. These products are available in various materials (*Glass, Acrylic, Fabric, Felt and felt like, Laminate, Wood etc.*) and sizes. Selecting the correct product should only come after adherence to a protocol, understanding the correct placement, and determination of the structural attachment of these barriers.

Barriers for Dividing Space

The images below represent only a few examples of the many products available to safely separate staff in open areas. These Barriers are available in various materials (*Glass, Acrylic, Fabric, Felt and felt like, Laminate, Wood etc.*) and sizes. Selecting the correct Barrier should only come after adherence to a protocol, understanding the correct placement, and compliance with the manufacturers guidelines for use, and installation.

Signage Package:

We've developed a library of graphics with health tips to your associates navigate throughout your space while maintaining the social distance guideline of 6' advised by the CDC.

Lobby / Welcome

Signs outlining your office policy, making visitors/ associates aware of the different graphics around the office.

Office Flow

Different graphics showing circulation paths, waiting areas, the maximum amount of people allowed in different rooms.

Instructional

Graphics demarcating social distancing measurements

Arenson Is Here To Help

Arenson is a workplace expert. We understand products, spacial relationships and are up to date on the most recent government regulations and recommendations. We can provide guidance and expert solutions to best protect your staff and your company.

ECS Presents Puro Lighting

Killing Viruses Through On-Demand & Automated
UV Disinfection

About ECS

Leaders in Energy Efficient Lighting and Controls Since 1995

Turn-Key Services

Direct Distributor of All Major Lighting Brands

In House Project Management & Installations

Markets Served: Commercial, Industrial, Retail, Grocery, Healthcare,
Hospitality, Education & Multi-Family

Puro UV Light Product Highlights

- Designed to be installed in recessed, surface or as a mobile unit
- BACnet Compatible for BMS integration & Automation
- Effective in as little as 15 minutes
- Built-in motion sensor that will deactivate the unit if triggered.
- Chemical Free Disinfection
- F1 Uses 40W over 1 Hour and F2 120W @ 120V

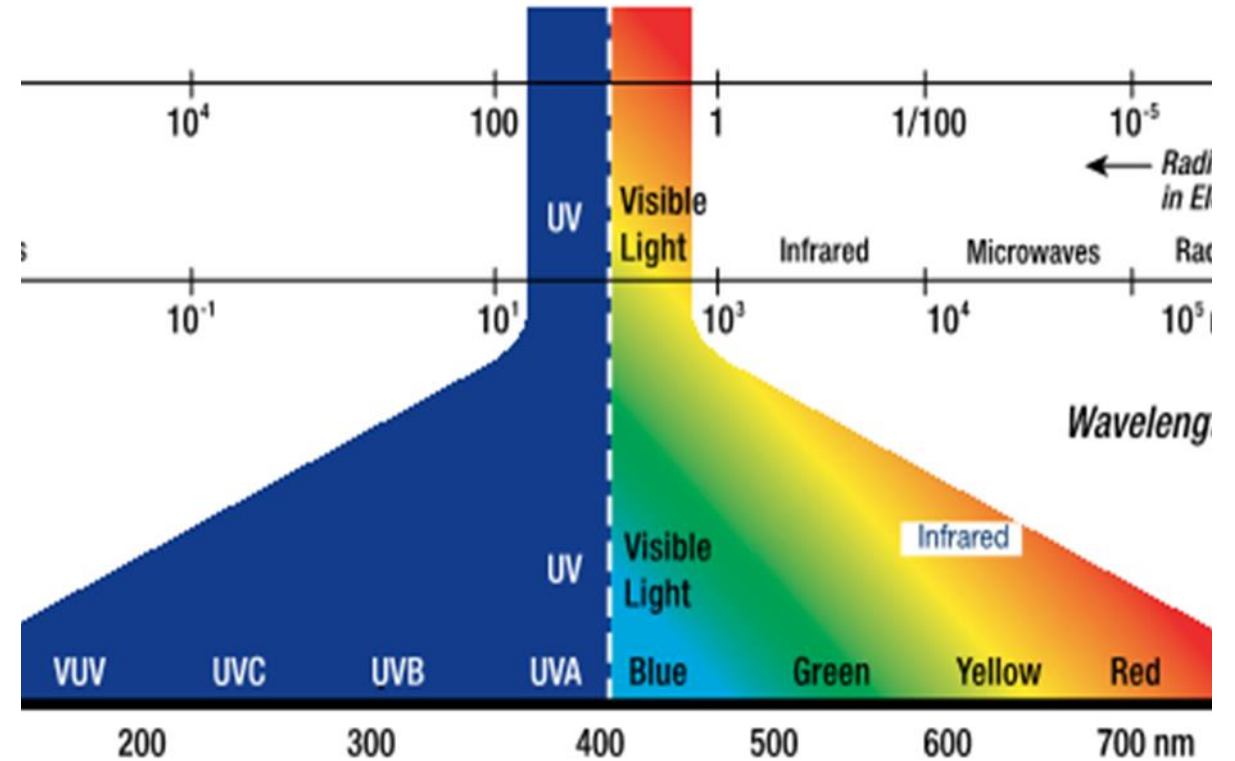

Where Can We Use It?

- Puro Violet Defense technology is best utilized in high touch/high traffic areas.
- Mail Rooms
- Waiting Rooms
- Cafeterias
- Schools
- Lobbies
- Elevators
- ATM Vestibules
- Fitness Centers

How Does UV Light Kill Viruses?

-  Sterilization / Antiviral
240-360nm
-  Antimicrobial / Antibacterial
360-430nm
-  Commercial / Residential
450-475nm

Puro Lighting uses “Violet Defense” technology. It utilizes germicidal UV-C, UV-B, and UV-A to optimize its germ-killing efficiency.

It's Verified

- Per the EPA emerging pathogen guidelines and based on clinical testing completed, Puro UV lights have efficacy against Class 2 and 3 viruses, including coronaviruses, SARS, Influenza and Ebola.

Certifications

- Internal components of this device are UL Listed, UL Recognized or CE listed.
- The manufacturer is registered with the US Environmental Protection Agency (EPA). Clinical laboratory testing has been performed at independent labs.

This device is tested and certified by TUV to UL specifications.

Tested to be compliant with FCC Part 15 Class A.

CASE STUDY

MTA to use ultraviolet lights to kill coronavirus on NYC subways & buses.

<https://www.nydailynews.com/coronavirus/ny-coronavirus-uv-lamps-subway-buses-mta-20200503-vwx6nmxfjbgmlpr2kojnskbvk4-story.html>

Couple a self-contained UV reflective tent with Puro UV disinfection lights.

Disinfect any object on-demand in safe and controlled environment.

Portable Disinfection Tents are great Turn-Key solutions for mail rooms, construction site tools, children's toys, office supplies and many others...

Body Temperature Measurement Solutions

PERSONNEL MANAGEMENT KIOSK

Meridian's Personnel Management Solution features check-in and temperature verification capabilities. The solution can also be programmed for facial identification, with users easily added in a few short clicks. Designed to help protect the health and safety of both employees and guests by preventing anyone with a temperature from entering a facility, alarms can be added to sound when those above the temperature threshold and those without access attempt to enter.

SOCIAL DISTANCING BARRIERS

WE CAN CUSTOMIZE SIZE, SHAPE AND OPTIONS TO MEET YOUR SPECS

Help maintain social distancing and physical separation while protecting employees with our acrylic desk and partition barriers. Acrylic sneeze guards, desk separators, front desk barriers, cough screens and other acrylic and whiteboard partitions are more important than ever to maintain cleanliness in work spaces. We have a selection of panel dividers and mobile rooms dividers that can easily and quickly be added to any commercial area without incurring any costly construction.

We manufacture in the United States with quick turn-around times for large and small quantities.

POTENTIAL SOLUTIONS FOR YOUR BUSINESS

1. CDC recommended hanging graphics
2. Acrylic barriers to protect employees and customers
3. Social distancing floor graphics for castwraps and checkout lines

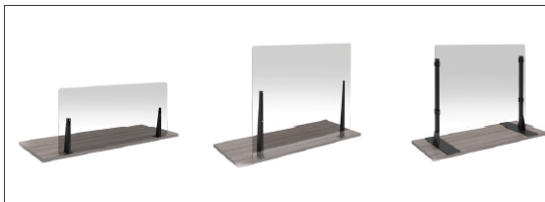

Lexan Freestanding Screen (Shown on Calibrate® Reception)

Surface Top Transaction Screens

Protective shield/sneeze guard for intake areas and transaction/reception. Mount flush to surface or 2" above surface to support transactions.

Free standing 24x30 Germ Shields

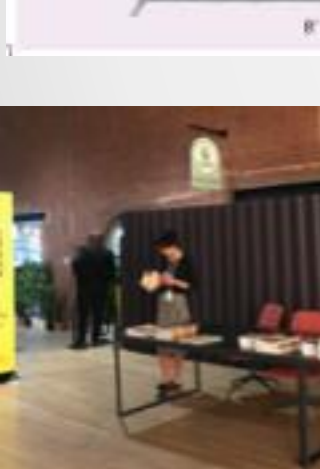

MODEL & DESCRIPTION:

- ALTSG-24x30 (Germ Shield, 24"W x 30"H). All 1/4" clear acrylic construction. Includes one shield with pass-thru (12"Wx3"H) and two legs. Speaking holes not included (can be drilled in the field if needed)

Custom sizes are available in quantities of 200 or more (lead-times will vary).

Wipeable vinyl
easy to clean!

AN OPEN DOOR OPPORTUNITY

With the threat of germ cross – contamination more globally recognized than ever before, the latest survival strategy among today's Away-From-Home patrons has become simple: "Don't touch anything!" Yet, with all the modern "touch-free" advances in washroom hygiene, it's hard to grasp why the door handle has been so universally ignored. Until now. Enter Pürleve™, the innovative door handle solution that offers a clean, sanitary experience for every user . . . every touch, every time.

Employing a proprietary Automatic Sleeve Dispenser (ASD) technology for either a Push-Pull or Lock / Latch door, Pürleve automatically advances an antimicrobial sleeve over the handle with every use. Finally, visitors to washrooms and other public areas are no longer affected by the questionable hygiene habits of all the people who have gone before them.

PÜRLEVE helps 'DECREASE CROSS CONTAMINATION & MAXIMIZE HEALTH & HYGIENE.'

- 1 in 3 People do not wash their hands after using the washroom...
- 80% of infectious illnesses are transmitted by touch...
- Within one hour 1,000 bacteria on a handle becomes 16,000 — it takes only 100 bacteria to infect a person...
- Compliance for hand washing in most hospitals is only 40%...

When it comes to germs and cross- contamination, the numbers speak for themselves. Cross-contamination occurs when germs are spread from one person to another simply by touch—directly or indirectly. Once a surface is touched, bacteria are transferred to it immediately.

PÜRLEVE helps 'ENHANCE WASHROOM IMAGE'

Pürleve's hygienic door handle supports the elimination of the unsightly mess of wet, dirty paper towels that end up on the floor and overflow the washroom receptacles. As the final piece in an increasingly in-demand collection of advanced, automated washroom fixtures, Pürleve aids in improving public hygiene, minimizing cross-contamination and promoting the image of a clean, healthy environment among guests.

PÜRLEVE is 'GREEN'

At Pürleve™, we support the global green initiative. Hygienic Door Handle systems incorporate lead free electronics and low-power systems resulting in reduced energy consumption to efficiently drive the technology within. The door handle refills use no paper and the antimicrobial sleeve material that each handle advances is 100% recyclable. Support in the reduction of Paper Towel consumption.

SOCIAL DISTANCING BARRIERS

WE CAN CUSTOMIZE SIZE, SHAPE AND OPTIONS TO MEET YOUR SPECS

TensabARRIER® Advance Post

Ideal for organizing queues and putting into practise good social distancing in all customer facing environments. Position posts 6 feet apart as an indication to customers on how far apart they should be standing from the person in front of them.

Safe Distance Floor Markers

A solution that can quickly be deployed around entrances and exits, general areas and within queues to help customers identify a safe distance to stand when queuing or walking through your environment.

TensabARRIER® Post Top Signage

Simply slot on top of your TensabARRIER post to communicate important safety messages with your customers without human contact. Ideal for advising customers to stand 6 feet apart from the person in front of them.

TensabARRIER® Post Top Labels

Customize any of our TensabARRIER® posts with a custom post top label reminding customers of key tips to fight the spread of Coronavirus. Examples of this: wash hands frequently, catch it bin it kill it, avoid touching eyes nose mouth, keep 6 feet apart from the person in front of you.

Road Cone

Tensator traffic cone can be placed in virus drive-up or walk-in testing zones to indicate where people should wait. It has a secure base and outdoor-ready material construction that makes it applicable to both indoor and outdoor use. Can be easily manipulated to create different queue layouts as needed and is compact enough to stow for transport or storage.

WE CAN CUSTOMIZE SIZE, SHAPE AND OPTIONS TO MEET YOUR SPECS

Tensator® Titan Barricade

A strong and effective solution, ideal for managing crowds of people or preventing access to areas. Hook and eye locking system connects the fences, making them harder for crowds to move.

Cleaning in Progress

Authorized Access Only

Caution - Do Not Enter

No Entry

Emergency Exit

TensabARRIER® Printed Webbing

All of our products can be made with eye-catching safety messages to help keep your customers and employees safe while on-site during this pandemic.

300 Plastic Post

A lightweight, clearly visible option to show where queues should form or can be used to cordon off unsafe or restricted areas. It is available in yellow, black or white color options and short or long chain lengths depending on spacing needs. Plastic composition makes it ready for outdoor or indoor use.

Also available in Black and White finishes

TensabARRIER® Wall Units

Quickly and efficiently cordon off out of service areas to the public. Ideal for clearly defining routes and restricting access to areas that you want to cordon off and can fix to most surfaces either semi-permanently or permanently.

TensabARRIER® Facility Post

Ideal for outside or back of house areas, limit customer access or create safe zones for your warehouse staff. The post and base can be easily dismantled without the use of tools, for easy storage and transportation.

BACK TO WORK KITS

- American-made, double-knit 14.9 oz. mask (available in black, white or navy)
